

INTRODUCTION TO BiTEA LIMITED

WORKING FOR SECURE PUBLIC SAFETY COMMUNICATIONS

BiTEA is an innovative technology company located in the ancient maritime town of Maldon, Essex, United Kingdom. The company was formed in 2005 to design and develop a range of electronic and software support products for users and operators of TETRA (TERrestrial TRunked RAdio) networks and is a privately owned and independent organisation. The company members have been involved professionally with mobile radio, electronics and computing since 1969.

TETRA is a state of the art digital encrypted mobile radio system, currently being introduced worldwide particularly where secure and reliable communications is required. TETRA has been introduced for use in public safety and commercial applications in more than 100 countries and BiTEA is ready to offer a range of support products.

BiTEA will also accept 3rd party project work for the design of electronics, hardware and software.

Further details can be found on www.bitea.com by contacting info@bitea.com or by calling the office in Maldon on +44 (0) 1621 855544
