

PELITM
STORM CASETM

Peli Storm Cases are rugged transit cases to hold and protect your valuables. Engineered for extreme conditions and wide ranging applications, Peli Storm cases are built from Pelican's patented HPX® high performance resin which makes them lightweight and virtually indestructible.

- 23 models to choose from
- Press & Pull latches open with the press of a button
- Impact resistant material
- O-ring sealed and watertight
- Vortex® valve automatically adjusts air pressure without letting in water
- Durable, wide, soft-grip handles
- Wheeled cases
- Withstands extreme temperatures
- iM2050. iM2500 meets airline carry on regulations

Wheeled Case

Press & Pull® Latches

These smooth-opening, dependable, patented latches hold tight under pressure and impact. Tested to over 180 Kg, they open with a simple release button.

Moulded-In Lockable Hasps

Twin mating hasp holes on the rim of the case allow attachment of padlocks to keep your gear in and thieves out. Peli's TSA (Travel Security Administration) cable padlock is a three digit combination lock. Works with a TSA pass key enabling access by inspectors (only in USA).

Rugged In-Line Wheels

Shielded from dust, dirt and other contaminants, ball bearing wheels provide low-friction, low-drag rolling with retractable handles for easy movement of heavy loads. Look for the  icon for availability on select models.

Vortex® Pressure Release Valve

The built-in technology of Peli Storm Cases automatic pressure equalisation valve is also a patented feature. This valve prevents vacuum lock allowing the case to be opened easily even after extreme altitude changes. At the same time, the microscopic filter blocks water molecules and dust particles so your gear stays clean and dry.

Double-Layer, Soft-Grip Handles

An overmoulded layer grips to the polymer handle for a durable, comfortable non-slip grip.

Peli Storm Case Accessories

Foam sets

Pick n pluck foam layers are cubed so they can be cut to fit the contents snugly. The number of layers depends on the depth of the case. A convoluted section of foam is included for the lid.

Solid foam sets are supplied for im3100-im3300 models to cut/shape to your own requirements. The case is filled with layers of foam, the number of which depends on the case depth.

Lid Organisers

Peli Storm Case lid organisers feature a multitude of pockets in various sizes to protect and keep gear organised. The lid organiser is attached to the case lid with Velcro® strips. They are available in different versions, depending on the case model (selected models only).

Padded Dividers

A divider system for creating custom compartments within the case to give the equipment separate and secure, padded protection. Divider sets consist of padded sections which are covered in a water-resistant, PVC-coated nylon fabric, and can be configured and reconfigured to meet your exact (if changing) needs. A convoluted section of lid foam is also included providing the ultimate in cushioned protection.

Base and Lid Bezel Kits

Storm Case bezel kits are supplied as an aluminum frame system for mounting equipment into the base or lid of the case. They incorporate moulded corner pieces that will fit at any depth within the case, and utilise extruded aluminum for the bezel sides. These aluminum sides screw directly to the side of the case and rubber o-rings keep the unit watertight. Your panel is screwed directly to the bezel. This offers greater flexibility for placement in the case, and much better durability. Bezel mounts can be used to house electronics or test and measurement equipment within the case.

Peli TSA Cable Lock

A three digit combination TSA approved lock. Works with a TSA pass key enabling access by inspectors (only in USA).

Full range of Peli™ Protector Cases, Peli Area Lighting Systems & Torches are also available.

All Peli cases are covered by the legendary "You break it, we replace it" **lifetime** guarantee.
