\*mAh at 5v

Quality of UV will affect performance of solar panels.  
For optimal charging, always use outdoors as domestic  
and vehicle glass often contains UV filters.

- **powerchimp and motormonkey (in-car charger) combined**

> [powertraveller.com](http://powertraveller.com)

A photograph of a monkey sitting on a wooden deck, looking towards a solar-powered phone charger. The charger is a small, rectangular device with a solar panel on the top half and a phone charging port on the bottom half. A cable is plugged into the port. The scene is set outdoors, with sunlight filtering through the trees, creating dappled shadows on the deck.

“ I was on a camping safari throughout Southern Africa – the solarmonkey was very handy for keeping my phone charged ”

Nick Ledger, Photographer

# motormonkey

Charges: iPads > Mobiles >

The powermonkey explorer is a remarkable piece of kit.  
We have just completed a five week expedition crossing  
the Hardanger Glacier. This power source proved itself  
essential time after time ”

David Davenport,  
Director of DXM Project Management

# startmonkey200

Charges: [Cars](#) > [Boats](#) > [Motorcycles](#) >

When a RIB won't start due to a flat battery and is three to four boats out on the pontoon, moving the boat or replacing the battery is a time-consuming and potentially dangerous task. We used the startmonkey200 on three to four occasions where boats had flat batteries and found it to be perfect for the job”

Yamaha Motor  
(UK) Limited

# startmonkey400
